

Adeneo Training Expertise

Adeneo Embedded helps customers get the most out of their investment in embedded and real-time technologies through a wide range of basic to advanced training offerings. We collaborate with Silicon Vendors and distribution partners to provide relevant up-to-date courses. We also offer customized training for clients to meet their specific design, architecture and operating system needs.

To meet education needs, we provide regularly scheduled instructor-led classes at locations throughout North America and Europe.

Customized Class

Windows Embedded Expertise

Committed to embedded systems education and building deep technical expertise, we offer training courses as a Microsoft Certified Training Partner. Adeneo Embedded has been recognized by Microsoft with Windows Embedded Partner Excellence Awards:

"Systems Integrator of the year: 2007 & 2009" (Europe)

"Systems Integrator of the year: 2009" (North America)

"Training Partner of the year: 2008 & 2009" (North America)

Our customers benefit from high quality trainings thanks to our engineering team which is Windows Embedded CE 6.0 MCTS certified. Adeneo Embedded is the only Microsoft partner with 6 Windows Embedded MVPs (Most Valuable Professionals) on its staff.

Windows Embedded Training Services

Features and Benefits

All attendees to a 3+1-day training on Windows Embedded CE receive for **FREE** one of the following ARM-based development kits from one of our Silicon Vendor partner (\$750 to \$1,495 value)

ALSO INCLUDED the following Book and DVD

1 day "hands-on labs" workshop

- ✓ Introduction to CE 6.0 R3 or WES 7 development
- ✓ Device drivers for Windows Embedded CE 6.0 R3
- ✓ Application development for Windows Embedded CE 6.0 (C++ and C# applications OR Silverlight application)

Discounts on development kits and 3+1-day training classes

3+1-day in-depth technical training either on CE 6.0 R3 or WES 7

- ✓ **3-day initial content** based on course structures from Microsoft official curriculum
- ✓ **1-day optional course** built with advanced modules by our senior engineers to enrich the initial content and accelerate developers device's design

Three days for initial content
US \$2,000 per attendee (1)
+
One day for optional content
US \$500 per attendee

(1) \$150 off if early bird registration

5-day customized training sessions

- ✓ Session performed on customer site
- ✓ Focused on specific customer needs
- ✓ Combined with different modules from the track above
- ✓ Lab performed on customer's dedicated target or emulator
